Gabriel Adjei Boampong

Applications Developer & Database Engineer | Data & BI

Accra, Ghana gabrieladjei0@gmail.com 024 293 1397 gabrielboampong.xyz gabrielboampong

gabrielboampong

Profile

Applications Developer and Database Engineer who works mainly in data and business intelligence, using SQL, relational database design, Power BI and Excel reporting, and data validation. Most of my time goes into building applications and reporting systems backed by solid databases, including internal MIS and intranet platforms and a real time BI dashboard that reads straight from live data.

I'm currently pursuing an MSc in Big Data Analytics at the University of Ghana, pairing that practical background with deeper academic training in analytics, machine learning, and data engineering.

Education

MSc — **University of Ghana**, Big Data Analytics — Accra, Ghana
In progress — Oct 2025 – Nov 2026
- Coursework covering big data analytics, machine learning, data engineering, and using data to support better decisions.

BSc — **Kwame Nkrumah University of Science and Technology (KNUST)**, Computer Science — Kumasi, Ghana
Sept 2019 – Nov 2023

WASSCE — **Achimota Senior High School**, General Education — Accra, Ghana
Sept 2016 – July 2019

Experience

DS7 Limited, Applications Developer & Database Engineer — Ghana
Apr 2025 – present
1 year 5 months
- Build and maintain applications backed by solid, scalable relational databases.
- Develop application features and services that connect SQL data access to the business logic behind them.
- Write and tune SQL queries for day to day data extraction, analysis, reporting, and application workflows.
- Design and maintain the logical and physical database models that keep these applications scalable.
- Build Power BI and Excel reports that give the business better visibility and support decision making.
- Check data quality and consistency across systems, and dig into discrepancies that affect downstream reporting.
- Build universes in SAP Information Design Tool to support BusinessObjects reporting.
- Work closely with developers, analysts, and stakeholders to turn operational requirements into solutions that actually hold up.

Family Fountain Assets and Securities Limited, Back Office Support — Ghana
Apr 2025 – present
1 year 5 months
- Support day to day operational and administrative processes across back office activities.
- Maintain accurate records and reconcile data to keep account information consistent.
- Prepare and validate operational reports for internal review and follow up.
- Support data accuracy and reporting requirements across operational workflows.

Universal Engineering and Consultancy Services Limited, Monitoring and Evaluation Trainee — Ghana
Nov 2023 – Sept 2024
11 months
- Analyzed fuel consumption, delivery schedules, and stock level data to support operational monitoring.
- Investigated data inconsistencies and helped put corrective actions in place for stock discrepancies.
- Provided IT support by troubleshooting system and network issues.

Npontu Technologies Limited, Information Systems and Security Intern — Ghana

- Developed Grafana dashboards to improve visibility into systems and operational data.
- Conducted cloud computing research to support scalability and technical decision making.
- Monitored systems for integrity, availability, and security related issues.

Oct 2022 – Dec 2022
3 months

Universal Engineering and Consultancy Services Limited, IT and Automation Intern — Ghana

- Supported research and development of fuel level overflow and underflow indicators.
- Assisted with IT support, system troubleshooting, and network configuration.

Nov 2021 – Dec 2021
2 months

Projects

MIS and Intranet Systems
Designed and built secure internal platforms that bring staff records, communications, administration, and workflows into one place, with role based access control. Built with PHP and PostgreSQL.

Real Time BI Dashboard
A live dashboard that reads straight from the source database and turns operational data into KPIs, trends, and drill down views, so teams are not waiting on manually prepared reports.

Database Engineering and Reporting
Relational schema design, optimized SQL, SAP BusinessObjects universes, and Power BI reports, with validation built in at every step.

Personal Web Projects
Outside of work I design and build my own products end to end, including KUCHILL (an online store for a fashion label), DigiHub (a marketplace connecting shoppers with local sellers), and Chale, Where? (an app that helps people decide where to go out in Accra). Built with Next.js, React, Astro, and TypeScript.

Skills

Data & Analytics: SQL, Power BI, Excel, Power Query, Grafana, Tableau, SAP BusinessObjects, SAP Information Design Tool, Data Validation, Operational Reporting

Databases: PostgreSQL, MySQL, SQLite, Relational Database Design, Schema Design, Query Optimization

Application Development: Python, Django, Flask, PHP, JavaScript, TypeScript, React, Next.js, Astro, Tailwind CSS, HTML, CSS, React Native, REST APIs, Role Based Access Control

Engineering & Tools: Git, GitHub, Docker (Basics), Visual Studio Code, XAMPP, Systems Monitoring, Technical Documentation

Professional Skills: Analytical Thinking, Problem Solving, Stakeholder Collaboration, Data Quality Management, Technical Communication

Achievements

- Helped improve data collection processes, cutting project delays and lifting workflow efficiency by about 20%.
- Supported project teams through system automation work, helping deliver projects on time and to a higher standard.
- Researched and rolled out cloud computing solutions at Npontu Technologies to support scalability and security.
- Built a web application with Django as part of a collaborative final year university project.

Certifications

- Accenture North America Data Analytics and Visualization Job Simulation, Forage, September 2024
- KPMG AU Data Analytics Job Simulation, Forage, September 2024
