Gabriel Adjei Boampong

Applications Developer & Database Engineer | Data & BI

Accra, Ghana gabrieladjei0@gmail.com 024 293 1397 gabrielboampong.xyz gabrielboampong

gabrielboampong

Profile

Applications Developer and Database Engineer with experience spanning SQL, relational database design, application development, business intelligence, data validation, and operational reporting.

Experienced in building database-backed applications, developing Power BI and Excel reports, writing and optimizing SQL queries, and improving data quality across operational systems.

Currently pursuing an MSc in Big Data Analytics, combining practical engineering experience with advanced training in analytics, data management, and data-driven decision-making.

Education

MSc — **University of Ghana**, Big Data Analytics — Accra, Ghana
In progress — Oct 2025 – Nov 2026

- Advanced study focused on big data analytics, machine learning, data engineering, and data-driven decision support.

BSc — **Kwame Nkrumah University of Science and Technology (KNUST)**, Computer Science — Kumasi, Ghana
Sept 2019 – Nov 2023

WASSCE — **Achimota Senior High School**, General Education — Accra, Ghana
Sept 2016 – July 2019

Experience

DS7 Limited, Applications Developer & Database Engineer — Ghana
Apr 2025 – present
1 year 5 months

- Build and maintain applications backed by well-structured and scalable relational databases.
- Develop application features and services that integrate SQL data access with business logic.
- Write and optimize SQL queries for data extraction, analysis, reporting, and application workflows.
- Design and maintain logical and physical database models to support scalable applications.
- Build Power BI and Excel reporting outputs to improve operational visibility and support decision-making.
- Validate data quality and consistency across systems and investigate discrepancies affecting downstream reporting.
- Build universes in SAP Information Design Tool to support BusinessObjects reporting.
- Collaborate with developers, analysts, and stakeholders to translate operational requirements into reliable technical solutions.

Family Fountain Assets and Securities Limited, Back Office Support — Ghana
Apr 2025 – present
1 year 5 months

- Support day-to-day operational and administrative processes across back-office activities.
- Maintain accurate records and reconcile data to keep account information consistent.
- Prepare and validate operational reports for internal review and follow-up.
- Support data accuracy and reporting requirements across operational workflows.

Universal Engineering and Consultancy Services Limited, Monitoring and Evaluation Trainee — Ghana — Nov 2023 – Sept 2024 — 11 months

- Analyzed fuel consumption, delivery schedules, and stock-level data to support operational monitoring.
- Monitored systems and reporting workflows for data accuracy and compliance.
- Investigated data inconsistencies and supported corrective actions for stock discrepancies.
- Provided IT support by troubleshooting system and network issues.
- Supported data collection and reporting processes to improve operational visibility.

Npontu Technologies Limited, Information Systems and Security Intern — Ghana — Oct 2022 – Dec 2022 — 3 months

- Developed Grafana dashboards to improve visibility into systems and operational data.
- Conducted cloud computing research to support scalability and technical decision-making.
- Monitored systems for integrity, availability, and security-related issues.

Universal Engineering and Consultancy Services Limited, IT and Automation Intern — Ghana — Nov 2021 – Dec 2021 — 2 months

- Supported research and development of fuel-level overflow and underflow indicators.
- Performed troubleshooting and data processing tasks to support project objectives.
- Assisted with IT support and system troubleshooting.
- Configured and maintained network systems to improve technical performance.

Projects

Database-Backed Applications & Business Systems
Development and maintenance of applications and services backed by relational databases.

Operational Reporting & BI
Power BI and Excel reporting workflows designed to improve operational visibility.

Data Quality & Validation
Data validation and discrepancy-control work across operational reporting systems.

Django Web Application
Collaborative Django-based web application developed as a final-year university project.

Skills

Data & Analytics: SQL, Power BI, Excel, Power Query, Grafana, Tableau, SAP BusinessObjects, SAP Information Design Tool, Data Validation, Operational Reporting

Databases: PostgreSQL, MySQL, SQLite, Relational Database Design, Schema Design, Query Optimization

Application Development: Python, Django, Flask, PHP, JavaScript, HTML, CSS, React Native, REST APIs

Engineering & Tools: Git, GitHub, Docker (Basics), Visual Studio Code, XAMPP, Systems Monitoring, Technical Documentation

Professional Skills: Analytical Thinking, Problem Solving, Stakeholder Collaboration, Data Quality Management, Technical Communication

Achievements

- Improved data collection processes, reducing project delays and increasing workflow efficiency by 20%.
- Supported project teams in completing system automation projects, improving project delivery timelines and quality.
- Researched and implemented cloud computing solutions at Npontu Technologies to support scalability and security.
- Developed a Django-based web application as part of a collaborative final-year university project.

Certifications

- Accenture North America Data Analytics and Visualization Job Simulation, Forage — September 2024
- KPMG AU Data Analytics Job Simulation, Forage — September 2024
